

January 16, 2008:

To All Members:

It is our unpleasant duty to inform you that yesterday we were informed that the piping and related work will not be completed until approximately the end of the dry season and that, as a result, we will not receive dam water this year.

We ... have found out that the reason is agreement with Tlachichilco and so the pipes are being installed on that side as well. Also when complete the piping is to be covered with a walking path which will be great for all of us who like to walk.

The Board of the A.C.
